<p><i>Picture of poor nonenergized water</i></p>	<p><i>Picture of ordinary normal water</i></p>
	

*Before being exposed to Golden rune glass*

Water used is from a sample taken from water supply in town Menges, Slovenia.

Water has chaotic structure without any shape or organized geometrical structure.

*After being exposed to Golden rune glass:*

Water used is from a sample taken from water supply in town Menges, Slovenia, which we expose to the energy of Golden rune glass.

Then we froze some drops and take a picture of it under microscope. As you can see the crystals are in nice geometrical shape with bursts of energy from the edges. You can also notice nice pattern in the middle, which suggests powerful flow of energy in it.

## **Conclusion:**

Our sample water showed significant change in crystal structure when exposed to energy of Golden rune glass.

So we can conclude that Golden rune glass will have **positive** influence on human body, if we use it to drink water or other liquids from it.
